

ABSTRACT OF THE DISCLOSURE

A new and distinct variety of grapevine which is somewhat remotely similar to the 'Thompson Seedless' grapevine, but from which it is distinguished in a number of respects by producing fruit with a delayed period of cluster ripening occurring in mid October for harvesting and shipment, or approximately four weeks after the fruit produced by the 'Thompson Seedless' grapevine and wherein the fruit is large, having a mild flavor, a light green skin coloration and a firm, crisp flesh.
